

ALL SURFACE CARS TIED UP BY POWER-HOUSE EXPLOSION

Boiler Valve Blows Out and all Manhattan Lines Stop in Rush Hour—Thousands Walk to Their Work.

A comparatively trifling accident in the main power-house of the New York City Railway Company, Ninety-sixth street and East River, at 7.45 o'clock this morning completely paralyzed the surface street railway lines south of One Hundred and Twenty-fifth street. On the upper east and west sides surface cars were tied up for hours, and all crosstown lines between One Hundred and Twenty-fifth and Twenty-third streets were put out of commission.

On the lower end of the island a makeshift shuttle service was inaugurated with power from downtown power-houses. The Broadway line was not open through until 10.30 o'clock. Not until nearly noon, with the aid of electricity diverted from the Subway, was the situation completely relieved.

The accident, occurring right on the threshold of the busiest part of the morning rush hour, caused a surprising confusion and inconvenience. The "L" lines and Subway were overwhelmed. No such street traffic conditions have been experienced in New York since the "L" and Subway strike.

The power-house between Ninety-fifth and Ninety-sixth streets on the bank of the East River, is the main source of electrical supply to the street railway lines of Manhattan Borough. Great cables convey the powerful current from there and through substations and "step down transformers" it is rendered fit for use.

Explosion Injures Watchman.

An eight-inch valve blew out in the power-house. Patrick Sullivan, the watchman, of No. 20 West Ninety-sixth street, was in the line of a stream of steam and hot water that followed the explosion. He was badly scalded. Steam poured through the hole left by the blown-out valve with a roar that was heard for blocks around, and the great building was soon filled with it.

In order to make repairs it was found necessary to shut down steam in all the boilers in the plant, including that from which the valve had blown. The dynamo stopped when steam was shut off and the current died away in the cables.

Every car in the upper part of Manhattan stopped. It was apparent that the power had given out, but of course the motormen and conductors, beset with questions, could not tell how long the suspension would last. The minutes sped by, the cars remained motionless and then began the scattering of the "L" lines and the subway.

Of course the overhead and underground systems were not prepared for the extraordinary rush, but the ticket agents cheerfully sold tickets until the platforms were jammed. Trains loaded to the limit rolled up and station hands made valiant efforts to squeeze a few more aboard. The Seventy-second and Ninety-sixth street stations of the "L" way and all Harlem stations of the Ninth, Third and Second Avenue "L" lines were scenes of riotous discomfort. Arrangements were made to supply current for cars in the lower part of the city, and they were switched back and forth below the congestion that could not be moved. A big gang of men was put to work on repairs in the power-house, and until they were completed electrical current was borrowed from the Subway.

The First Avenue horse-car line did the biggest business in its history. Every available car and horse were pressed into commission and some that did not appear to be available. After the explosion Sullivan was sent to the hospital badly injured and the doors of the power-house were locked. Policemen and detectives from the East Eighty-eighth street station clattered in for admission. At 10 o'clock a detective was admitted. He said that the work of repair was under way, but that several hours would be required to place the surface street railway lines of Manhattan on a normal running basis.

The principal business streets up town resembled a great parade day. In the wholesale district of lower Broadway, and in fact as far north as Fifty-ninth street, comparatively clear in the early hours of the morning, the impatient pedestrians forced each other into the streets. Streets for miles were packed with the great throngs, and express wagons and trucks were brought into play by those fortunate enough to be able to get a ride. Women and children mounted wagons at every opportunity, and in this means thousands got down town.

Sub and "L" Swamped. Neither the elevated nor the Subway trains could run on anything like their regular schedules. At some stations the crowds overpowered the guards, and for fear of more serious disturbances many stations were passed. Stops only were made at the most important points, where incoming passengers fought their way through the mobs who were attempting to alight.

On the upper East Side the inconvenience was most severely felt. Here, where thousands and thousands of workers who are employed down town, live, the walk to the south began long before 8 o'clock. Neither motormen nor conductors gave the passengers any encouragement whatsoever, and many of the walkers were compelled to trudge along for many miles.

At the power-house the officials declined at first to give out any information. "There are hundreds of thousands of people waiting," the superintendent there was told, "and they should know whether they will have to walk or wait until the service is resumed."

"All I can say," was the answer, "is that there has been a serious break and it may be hours before it is repaired."

Some of the uptown dwellers went to the nearest ferries crossing the East River, rode south on the Brooklyn cars and came to their work downtown by way of the Brooklyn Bridge. The lines involved were the Sixth, Seventh, Eighth, Ninth, Madison, Lexington, Third and Second Avenues, the Forty-second street and Tenth Avenue, Fifty-ninth street and crosstown, the Eighty-sixth street cars which go through the Park, the One Hundred and One Hundred and Sixteenth streets, Broadway and Boulevard, Broadway and Columbus Avenue, Seventh Avenue and Columbus Avenue, Grand street and the Thirty-fourth street crosstown cars.

When the fire started in the tunnel at No. 10 Allen street, Dwan found the non-stop cars crowded with people who could not get away. Tearing boards from a fence, he made a bridge over which many escaped. He saw a man hanging from the third floor fire escape and went up the fire escape and found a man hanging from the third floor. Dwan, a policeman who distinguished himself at the Allen street fire in which nineteen persons perished early on the morning of March 11, 1906.

NAMES POLICEMEN FOR HONOR MEDALS

Commissioner Bingham Announces Those Who Will Be Singled Out To-Morrow.

DWAN HEADS THE LIST.

James Fox and Daniel Shaw the Other Two Specially Honored.

The names of the special honor men who will receive medals for bravery during the police parade to-morrow were today announced by Commissioner Bingham.

The Rhineclander medal goes to Patrolman John J. Dwan, Eldridge street station; the Isaac Bell medal to Patrolman James Fox, Madison street station, and the Peter P. Meyer medal to Patrolman Daniel Shaw, of the Church street station.

Dwan, a policeman who distinguished himself at the Allen street fire in which nineteen persons perished early on the morning of March 11, 1906.

The Wanamaker Store

Store Closes at 5.30 P. M.

The Wanamaker Store

The Great Summer Event Is Ready-- The JUNE SALE of WHITE Superb Stocks of MUSLIN UNDERWEAR SHIRT-WAISTS and CORSETS

FIVE or six months ago it seemed very doubtful that we could provide a June Sale of Muslin Underwear that would be up to our splendid standards of the past. Prices were jumping up on cotton goods, laces, and embroideries, and manufacturers were refusing to duplicate orders to finish out our January Sale. For a month or more we received constant notifications of price-advances. But we won the victory this time as many a time before. It was only a question of finding manufacturers who could do what we required, do it right, and meet our idea of price. Some whom our past orders had made rich and independent, we had to abandon. Others who were eager to get the Wanamaker orders, have done magnificently by us; and our inspection of the merchandise they have sent us shows that they have kept every promise they made.

There is not a garment in the Sale so cheap that the work on it has been slighted; and from the lowest price to the finest, sizes are full and quality the best possible. The workmanship is thorough, and all the garments have been made in clean and sanitary factories. This June Sale shows very great improvement in the styles and trimmings of the garments. Stocks are larger than ever before, because we have greater space in which to display them, and we have anticipated very much increased sales.

There is immense advantage in selecting at the very beginning of the Sale, so as to secure the garments in their first freshness and beauty.

Following are a few of the prices and descriptions:

- Nightgowns**
At 25c—Of cambric or muslin, two styles; V or high neck; yoke of cluster plaits. Not more than three to a customer.
At 50c—Of cambric or muslin, two styles; V or high neck, with yoke of hemstitched plaits, or trimmed with tulle lace insertion, or ribbon.
At 75c—Of cambric, two styles; V or square neck trimmed with tulle lace or embroidery and plaits.
At 85c—Three styles.
At \$1—Seven styles.
At \$1.25—Two styles; kimono style.
At \$1.50—Four styles.
Others, at \$1.75 to \$18.00.
Second floor, Stewart Building.
- Petticoats**
At 50c—Of cambric; deep ruffle of cluster plaits.
At 75c—Of cambric, three styles; deep ruffle of plaits, or trimmed with embroidery.
At 85c—Three styles.
At \$1—Six styles.
At \$1.25—Two styles.
At \$1.50—Five styles.
At \$1.75—Seven styles.
At \$2—Of cambric, two styles; deep ruffle, trimmed with tulle lace or tulle lace insertion or plaits.
Others, at \$2.25 to \$22.00.
Second floor, Stewart Building.
- Short Petticoats**
At 25c—Of cambric; ruffle finished with hemstitched hem.
At 50c—Of cambric, two styles; trimmed with ruffle of embroidery and plaits, or hemstitched hem with plaits above.
At 75c—Of cambric, three styles; trimmed with lace, embroidery, hemstitching or plaits.

Second floor, Stewart Building.

Practical Jewelers Serve You at Lambert's

ONE strong reason why the public gets perfect satisfaction at our store is that we are practical jewelers, not mere examiners who pass judgment on work they could not produce. We not only can, but we do make the finest of jewelry. Show cases in our store are filled with the product of our factory up-stairs, and because it is our own product we sell to you without taking middlemen's profit out of your pocket.

A few things we do not make come to us in great quantities direct from the manufacturers. Gold must stand the test of the United States Assay Office or we will not ask our customers to look at it. Jewelry talk is timely now because wedding, engagement, graduation, confirmation and going away gifts are in demand. Will you not see for yourself the beauty of what we offer, and the pleasure and economy the Lambert system affords you?

Fine Gold Wedding Rings

Almost thirty years ago the first Lambert Seamless Solid Gold Wedding Rings were made. We had a reputation to make in those days and we put the best work we were capable of into them. This policy has never varied, and if the bridegroom-elect desires—as of course he does—that the ring shall be as perfect as the sentiment it represents, he knows where to come for it. All widths, sizes, shapes and styles. No charge for engraving.

14-kt.—\$3.00	14-kt.—\$4.25
18-kt.—\$4.00	18-kt.—\$5.50
22-kt.—\$5.20	22-kt.—\$7.25
14-kt.—\$5.25	14-kt.—\$6.10
18-kt.—\$6.75	18-kt.—\$8.15
22-kt.—\$9.10	22-kt.—\$10.30

We Fill Mail Orders for Wedding Rings.

The Watch Buyer's Reliance

Not one person in a thousand who buys a watch has the slightest practical knowledge of watches. The purchaser depends entirely on what the seller tells him. Hence the need of dealing with a perfectly reliable house. We have an immense trade in watches because an ever-widening circle of customers has learned to rely on our knowledge and our integrity.

This woman's watch has a solid 14-karat gold—engine-turned hunting-case. Choice of Waltham, Elgin or Lambert Works. Price, \$22.50.

Others, \$16.50 to \$150

Brilliant Diamond Rings

A group of diamond rings of various patterns, but alike in thorough, painstaking workmanship—the only sort of workmanship tolerated in the Lambert factory. Every stone is our own direct importation, every mounting is solid 14-karat gold, hand made. The prices cannot be matched anywhere. We make this statement with a full sense of our public responsibility.

Solid 14-karat Gold Ring, fine dia. 1.1 mm. \$10.00. Others, \$10 to \$500.	Solid 14-karat Gold Ring, fine dia. 1.1 mm. \$10.00. Others, \$10 to \$500.	Solid 14-karat Gold Ring, fine dia. 1.1 mm. \$10.00. Others, \$10 to \$500.

What We Can Do With Your Old Jewelry

Don't believe that your old jewelry is beyond hope of repair and remodeling. Let us show you how, at slight expense, we can refashion it into new shapes of beauty. This department of our business you will find a great convenience. A little deftness and know-how work wonders with old, broken, unfashionable ornaments.
